

Rapid Deployment Trailers

Overview

The requirement for totally mobile communication systems is now more than a decade old. The rugged Australian conditions and environment have taken their toll on some of the first fleets of trailer solutions.

ICS Industries have manufactured an extremely robust multipurpose base trailer with the versatility to adapt to multiple communication technologies and satellite antenna models. The varying requirements of equipment suppliers including space for customer branding is also accommodated.

Features

- Heavy duty hot dip galvanised base chassis
- Independent suspension
- Equipment rack cabinets with thermal management
- Multiple secure storage areas
- Fully compliant and road registered
- Fire extinguisher and safety signage
- Choice of hitches and towing equipment

Industry ruggedness and experience to make it last.
